

Textiles and Apparel

With comprehensive knowledge of the standards impacting textile and apparel performance, construction, and composition, UL's experts provide a vital check on product quality at every stage of production.

UL partners with clients throughout the production cycle to assess risk and develop solutions that effectively evaluate the quality and safety of textiles and garments, including:

- Apparel
- Accessories, gloves & hats
- Fabric and fibers
- Home textiles
- Handbags and luggage
- Leather
- Upholstery
- Yarn

Our test programs address all the components of the textile supply chain to assure products are safe, and manufactured to brand standards. An early review by our experts can reduce time to market and help avoid costly recalls.

- Fiber identification/content
- Restricted substances list (RSL)
- Care instruction and labeling
- Flammability
- Colorfastness
- REACH
- Mechanical testing
- Children's apparel risk assessments
- Moisture management
- Feather and down testing

Our inspection and factory audit solutions use industry and government standards to help you understand your factory's quality systems, production capabilities, as well as monitor social compliance. From factory to shelf, we help ensure products meet quality, safety, and social standards.
