

UL presents official trainings on the Higg Index

UL organizes official training sessions on the Sustainable Apparel Coalition's (SAC) Higg Facility Environmental Module (Higg FEM) 3.0 and its implementation throughout your supply chain.

Official Higg Index training include

- SAC mission and vision
- Introduction of the Higg Index
- Higg FEM
- Verifications
- Higg questions and interpretation
- Improvement plan
- Case study

Target audiences for these sessions are

- Top management
- Chemical and environmental management team
- Quality assurance team
- Maintenance team
- Production/operations team
- Purchase managers
- Employees involved in environmental affairs

UL's official trainer (Levels 1, 2 and 3)

Mohammad Shameem Hossain is UL's Higg Index training expert. He is a Higg Index trainer with Verification, authorized to offer Higg FEM training.

Higg Index TRAINER WITH
VERIFICATION SPECIALTY

Higg Facility Environmental Module

EXPIRES 2020-Jul-14

Contact us to organize an official Higg Index session for you and your suppliers

We can organize a private session for your supply chain in Bangladesh and India. Please contact us to receive a quotation and learn more about the training process:

- For trainings in Bangladesh, contact CustomerService.BD@UL.com
- For trainings in India, contact UL.IndiaCRS@UL.com

Do you want to increase your supply chain's awareness on the Higg Index?

UL's experts can organize complimentary seminars for your textile supply chain in Asia to increase awareness and knowledge of SAC and the Higg Index.

Ideal participants for these seminars include environmental managers, compliance managers, supply chain managers and factory managers.

What will participants learn?

1. Introduction to SAC and Higg Index
2. Development and use of the Higg Index
3. Higg Index modules
4. The importance of an environmental performance evaluation
